## **DETAILED ACTION**

### **Summary**

Receipt of Applicants Remarks and Amended Claims filed on March 30, 2007 is acknowledged. Applicant has cancelled claims 1-14 and submitted new claims 15-16, therefore, claims 15-16 are now pending in this application. In view of Applicants amended claims, the rejections over Berkeley (US 3,832,459) and Pera (US 4,906,488) have been withdrawn.

### ***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 15-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Wohrle et al. (US Patent 6,566,562).

Wohrle discloses, "the perfume oils comprising the isolongifolenol can be diluted with a solvent for perfumings. Suitable solvents for this purpose are, for example, diethylene glycol monoethyl ether, and diethyl phthalate" (column 9, lines 3-9).

Wohrle further discloses, "examples of perfume oils include: extracts from natural raw materials such as essential oils, concretes, absolutes, resins, resinoids, balsams, tinctures, such as, for example, orange oil; peppermint oil; vanilla extract; cinnamon leaf oil; cinnamon bark oil; and fractions thereof, or ingredients isolated therefrom" (column 4, line 48 through column 5, line 23).

### ***Response to Arguments***

Applicant's arguments have been fully considered but they are not persuasive. Applicant argues Wohrle fails to specifically teach a composition for use in asphalt and coal tar mixtures comprising an odor masking agent, as claimed by Applicant, combined with a holding agent that is structured to bond with obnoxious odors, wherein the holding agent is selected from the group consisting of: diethyl phthalate; and diethylene glycol methyl ether. Wohrle fails to disclose diethyl phthalate and diethylene glycol methyl ether as holding agents in a composition for use in asphalt and coal tar mixtures that is structured to bond with obnoxious odors. In response to applicant's argument that the references fail to teach the compositions intended use in asphalt and coal tar, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

### ***Conclusion***

No claims are allowable. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 1615

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
